 - b. Cemetery meeting- our neighbors don't understand what the purpose of these initial meetings is. These meetings are before the city is even involved, it is the first step in the process. All it is is for a zone change because it's not listed as a public facility zone. While it is non-conforming, nothing can be done (expansion, changes, etc). They are trying to bring it into RM (which opens the door for a whole plethora of possibilities). They say there are no immediate plans. People do not seem to want this change as they do not want a bunch of apartments built there. Had their required meeting, and now they get their paperwork together and submit it to the city, then the clock starts, and then have two weeks for public comment. Wait for the notification to get it on the public record. Can write, call, email etc to submit your public comment. The city is not getting any revenue on it as a PF zone. This is targeting the NW portion, the existing cemetery will remain.
